

Dimension & Weight :

Feet : L 6.56 / W 4.92 / H 5.24
Meters : L 2.00 / W 1.50 / H 1.16
Approximate Weight : 1,267 lbs / 575 kg

Features :

Unit is designed with the ultimate flexibility for performing heavy duty operations, compact design, robust, stand alone operation & transportable weight.

Unit has four lifting points for crane handling & includes integral forklift pockets for ease ground handling.

General :

Spooling unit structure constructed in steel. The Spooling unit is used for spooling **OFF** old wireline from the wireline unit drum and for spooling **ON** the new wireline on the wireline unit drum.

The function of unit is hydraulically driven shaft on which the new drum (shipping drum) is placed.

The hydraulically driven spooler shaft 4" diameter will accept all standard wire shipping drums small 30" (0.092") to large wooden 55" (7/32") flange diameter wire drums. Spooler shaft is removable for quick, easy reel change-out.

(Note: A spacer tube is provided for use with the narrower drums)

Hydraulic tension during spool ON & OFF is controlled from a control panel mounted on the side of the unit. The wire tension assembly traverses freely on sealed linear bearing and tensioning is done by two brake bands acting on the circumference of the tensioning wheel.

Braking is controlled by means of a hand wheel in front of the tension head.

The Operator Console :

Stainless Steel colour coded engraved with english letters.

Hydraulic :

Operation of spooler can be done from standard open-loop hydraulic power pack.

Application : Slickline

Optional Accessories :

- Jacking castor
Set of 4 wheels for easy shifting of units.
- Hooks to secure the unit by chain on deck.
- 25 hp diesel engine driven hydraulic power Pack.

Power Pack Safety Options ordering code :

- Z1 - Zone 1 (Electric or Air)
- Z2 - Zone 2
- RS - Rigsafe

Painting :

All steel materials are sandblasted to Sa 2 1/2, inorganic zinc primer coated and all aluminum materials are primed, painted to customer supplied color code with single stage Jotun paint products. supplied color code single stage Jotun hard top.

Note : Specifications may change based on equipment design configuration.
